(54) Title: MOUNTING APPARATUS

(57) **Abstract:** Apparatus for a vehicle assembly comprising a self propelled vehicle (2) and a load mountable to the vehicle (2) in a mounted position relative to the vehicle (2) and being detachable therefrom, the apparatus incorporating a drive means which is selectively drivable to move the load away from the mounted position on the vehicle (2). In an another embodiment there is a disclosure of a vehicle assembly comprising a self propelled vehicle and a load mountable to the vehicle in a mounted position relative to the vehicle and being detachable therefrom, wherein the vehicle is provided with a first guide means fixed thereto and the load is provided with a second guide means fixed thereto, the guide means are mutually cooperative to facilitate the mounting of the load relative to the vehicle, the first guide means being of complementary shape to the second guide means when on the mounted position.
